DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 9 are rejected under 35 U.S.C. § 102(b) as being anticipated by U.S. patent 4,076,283 to Harrison. The Harrison pipe connector includes a sphinctoral bands 28 surrounding a coupling sleeve 11. The coupling sleeve 11 includes a traction pin aperture formed by a traction pins 30,30' attached to the sphinctoral bands 28 and extending inwardly there from through the coupling sleeve 11 via a hole formed by the pin which is in an initially retracted position non-engaged with the pipes 12,13 and a retracted position engaging the pipes 12,13.

Claims 1 and 9 are rejected under 35 U.S.C. § 102(b) as being anticipated by U.S. patent 3,885,818 to Ammann. The Ammann pipe connector includes a sphinctoral bands 13,17 surrounding a coupling sleeve 33. The coupling sleeve 11 includes a traction pin aperture (see figs. 2-3) formed by a traction pins 30 attached to the sphinctoral bands 13,17 and extending inwardly there from through the coupling sleeve 33 via a hole formed by the pin which can be threaded to a retracted position non-engaged with the pipes 11 and threaded to a retracted position engaging the pipe 11.

Allowable Subject Matter

Claims 2-8 and 10-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
